- ANTENATAL CLINICS
- OUT-PATIENT CARE

24 HOURS SERVICES

WE CARE, GOD HEALS

HANDMAIDS HOSPITAL, IBIONO

It was officially opened in 2008 in Ibiono in Akwa Ibom State, Nigeria.

The population of the community is about 400,000, mostly peasant farmers who cannot ordinarily afford medical care, and so rarely go to the hospitals even when critical.

However, there is an average daily admission of 40 to 50 patients. The number is increasing on daily basis.

In spite of the growing need to attend to the medical needs of teeming patients, with only local efforts to sustain it, the facility remains a poorly equipped 25-bed space.

Handmaids Hospital, Ibiono

It provides several out-patient services, lacking the necessary accommodation/equipment for physical exam rooms, emergency unit, labor and delivery rooms, good laboratory, pharmacy, radiology unit and in-patient units.

It has one long hall demarcated by walls to serve as wards for different genders and age groups requiring hospital admission.

HANDMAIDS HOSPITAL, IBIONO

Due to the lack of basic supplies/equipment/medications/vaccines/means of transportation, many people die from preventable and treatable diseases and injuries.

Newborn babies sharing beds: Pediatric cribs and beds needed

VACCINE PREVENTABLE DISEASE

A man dying from bleeding due to untimely transfer and treatment

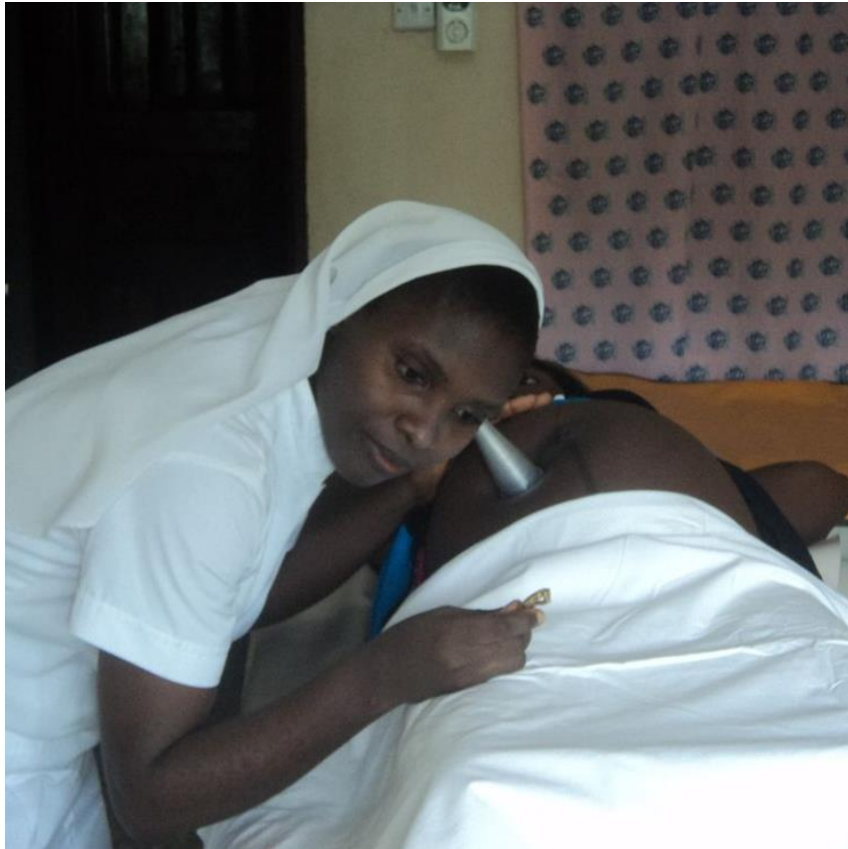

MALE WARD

LABOR WARD

Electronic Fetal doppler needed

EXAM ROOM

Exam tables needed
